

HoriZon overview

EverTrust HoriZon is a full feature, easy to use and versatile PKI Automation solution. Using standard protocols and proprietary APIs, HoriZon seamlessly integrates in corporate and cloud environments to automate certificate lifecycle, while ensuring compliance with centrally-defined trust policies via its SSL Scanner module.

With EverTrust HoriZon, you will get rid of certificate management hassle and expiration outage!

EverTrust HoriZon Modules

SSL Scanner Discovers and Keeps Compliance

- Scans your network for unknown certificates
- Finds revoked or expired certificates, in order to trigger their renewal
- Evaluates certificates cryptography

Protocol Proxies Automate Certificate Lifecycle

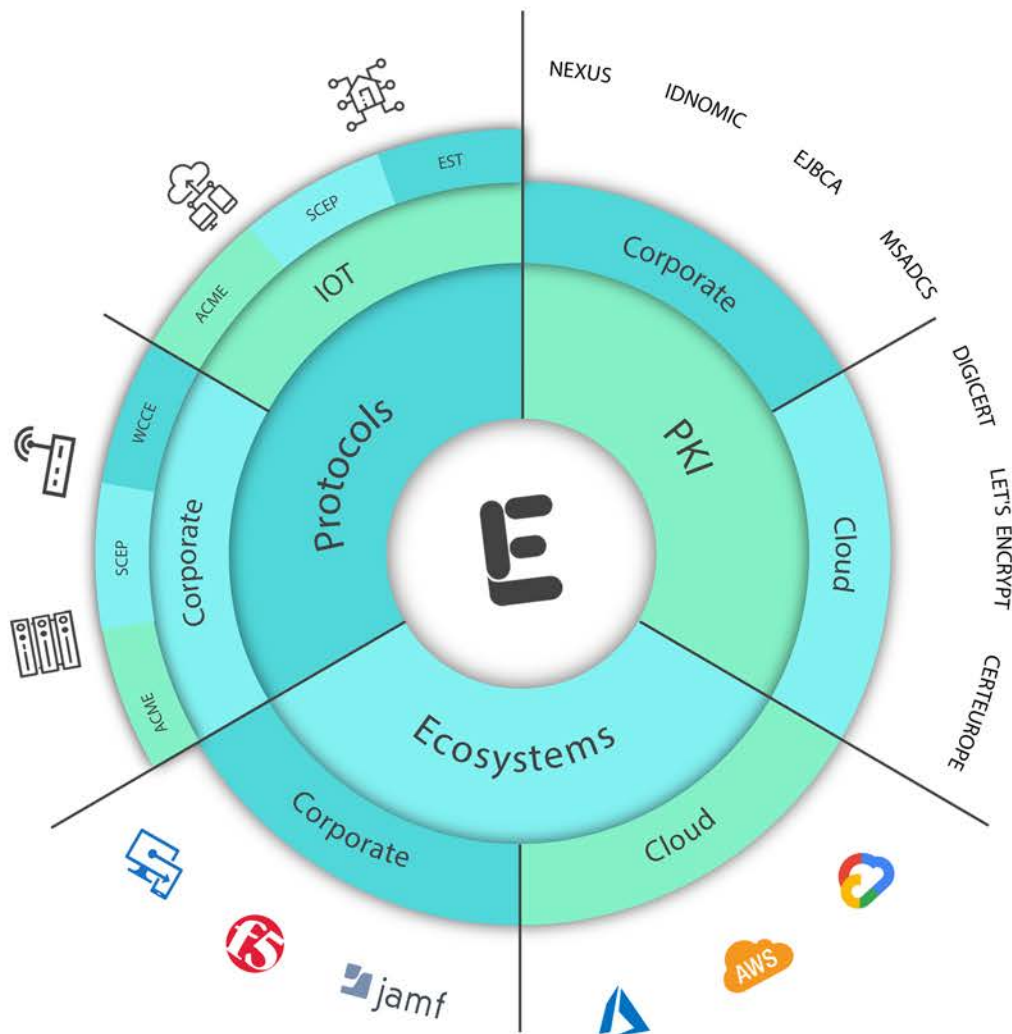

- Supports all popular ACME clients, including CertBot
- Manages SSL certificate lifecycle in private, public and IoT environments
- Integrates various scenarios, including Azure IoT Hub usage, DMZ, etc.

MDM Proxy Enables Mobile Endpoint Certification

- Supports Microsoft Intune SCEP integration mode
- Manages certificate revocation and user encryption certificate
- Proxies certification requests to your existing Certificate Authority

App & Cloud Manager Handles Certification Continuity

- Supports F5 BigIP, AWS ACM, etc.
- Handles full certificate lifecycle management
- Fully managed from appliances and cloud services interfaces

Supported Protocols and Ecosystems

- ACMEv2
- SCEP (network boxes and MDMs)
- EST (planned)
- WCCCE (Windows auto-enrollment)
- F5 BigIP
- Amazon AWS ACM
- Microsoft Azure KeyVault (planned)
- Google GCloud (planned)

Supported PKI

- Microsoft AD Certificate Services
- IDnomic OpenTrust PKI
- Nexus Certificate Manager
- DigiCert
- ACMEv2 enabled PKIs, including Let's Encrypt
- EJBCA
